## Public works information

In general, public works refers to construction projects that are paid for in whole or in part out of public funds, or if private funds are used, more than 50 percent of the square footage is leased to a public entity. Because of this, there are laws regarding many aspects of the construction projects to protect the public's interest.

One of the legal requirements for working on a public works project is the employment of apprentices. The Division of Apprenticeship Standards provides assistance to contractors in employing apprentices on public works sites.
